EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Charles K. (Kim) Middleton and John Musone on 3/2/06.

The application has been amended as follows:

Claims

Claim 1, 2nd line from the end "the inner" has been replaced by --an inner--.

9. (currently amended) A combustion chamber for a gas turbine, comprising:

an outer wall having an inner side and an outer side, and a first portion and a second portion;

an inner wall having an inner side and an outer side, and a first portion and a second portion;

a first temperature resistant liner attached to ~~positioned on~~ the outer side of the first portion of the inner wall and ~~attached to~~ positioned on the inner side of the first portion of the outer wall;

a second temperature resistant liner attached to ~~positioned on~~ the outer side of the second portion of the inner wall and ~~attached to~~ positioned on the inner side of the second portion of the outer wall; and

Art Unit: 3746

a plurality of fasteners adapted to removably connect the first and second portions of the inner wall,

wherein the inner wall comprises a plurality of wall elements abutting each other at a horizontal parting joint with the plurality of fasteners and-oriented at a non-perpendicular angle to the an inner wall surface and the horizontal parting joint.

Examiner's Comments

The above changes to the claims were made to give proper antecedent basis for "the horizontal parting joint" at the end of the claim and also to properly set forth the structure of the first and second liners above (these corrections were suggested in the office action of 09/20/2005). A terminal disclaimer was requested by the examiner based on US patent 7,007,489.
